WEEK 9 Workshop

1. Obtain the IMEI of your mobile phone (*#06#).
2. Analyse your IMEI using the tool in www.numberingplans.com (You may need to register first)
3. Identify the country and the network provider for the phones listed below. These phone numbers have been collected from phone book of the suspect and the International Crime Unit wanted to establish links between the suspect and these phone numbers. Once the country and the service provider is identified, the police could contact the network provider for further information of the suspects.

   +359895784358
   +33651827043
   +966531035267
   +79107076368
   +9053346992097
   +8801819118189

4. Use www.numberingplans.com to analyse the two ICCIDs8944110064068512973 and 8944110065658996864. Write out the information associated with them. Now try to alter the underlined digit of both ICCIDs and analyse the new ICCIDs. What do you notice?

5. Change the network operator from O2(11), to BT(77) of the ICCID, 8944110064068512973. Check the new ICCID with number analysis tool. Does it work? Now calculate the new Lunh digit by hand or use the online calculator, https://planetcalc.com/2464/, add the new digit to the new ICCID. Run the number analysis tool. Does it accept? What can you conclude?

6. Now try to fake the ICCIDs, 8944110065658996864, by changing the subscriber number. Analyse the new ICCIDs, what do you notice? Rework the correct Lunh digit and try again. Can you fake a new ICCID number?

7. Examine the numbering plans, for UK and see difference information.
   The police suspects Mr. Colin is involved in SIM card cloning. When they seized the equipment from his premise, they found a set of Issuer Identification Numbers (IIN) written on Mr. Colin's notes. The police asked you, as a forensic analyst, to identify the country, the geographical area, the company name, the address of the issuer and the service provider. Use (https://www.itu.int/dms_pub/itu-t/opb/sp/T-SP-E.118-2012-PDF-E.pdf) and www.numberingplans.com.

Remember to enter the correct number with the correct Luhn (you need to use the online calculator). Set the x to 0 and use the correct numbers of digits for ICCID, which is 19 to 20 digits, then use the Luhn calculator to find the last digit. https://deletionpedia.org/en/List_of_Issuer_Identification_Numbers.
